

The Rasmussen Group, Inc. 401(k) Retirement Plan

INVESTMENT PERFORMANCE AND OPERATING EXPENSES

The table below contains information about the investment options available in your plan. You can see how these investments have performed over time and compare them with an appropriate benchmark for the same time periods.

This table also shows:

- Total annual operating expenses (expenses that reduce the rate of return of an investment)
- Shareholder-type fees (these are in addition to total annual operating expenses)
- Investment limitations/restrictions

You can make changes to your investment options at www.wellsfargo.com, or you can call the Retirement Service Center (RSC) at 1-800-728-3123 and speak to a representative Monday through Friday 7:00 a.m. to 11:00 p.m. ET.

The cumulative effect of fees and expenses can substantially reduce the growth of your retirement savings. Visit the Department of Labor's website for an example showing the long-term effect of fees and expenses. Fees and expenses are only one of many factors to consider when you decide to invest in an option. You may also want to think about whether an investment in a particular option, along with your other investments, will help you achieve your financial goals.

The performance of your account may be different from the average annual return for the same investments. The timing of transactions in your account will have an impact, either positive or negative on your account return. Past performance is no guarantee of future results.

An index is a composite of securities that provide a performance benchmark for other funds and is not illustrative of fund performance. Indexes are unmanaged, do not incur management fees, costs and expenses and cannot be invested directly. Information is obtained from reliable sources, but is not guaranteed as to completeness or accuracy.

*Returns are since inception for funds that are less than ten years old.

Figures quoted represent past performance, which is no guarantee of future results. Investment return and principal value and yields of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower due to market volatility. These returns include reinvestment of dividends and capital gains. Government bonds are not insured or guaranteed by the U.S. Government.

** Investment options that show a net percentage lower than the gross percentage under total annual expenses have certain fee waivers in effect which reduce the expenses for that investment option. Net expenses per \$1,000 presume (but do not guarantee) that the fee waiver is in effect for the one-year period. For more information about any fee waiver, including its duration, see the investment option's prospectus or similar disclosure document. Any amounts that may have been rebated back to the plan from an investment option's total annual operating expenses are not taken into account in the net percentages or net expenses per \$1,000.

Unless noted in the investment chart above, a plan fiduciary is responsible for voting, tender, and other similar rights for the plan's designated investment options.

The fees noted above are paid to service providers for plan administration, such as loan processing, legal, accounting, and recordkeeping services. These fees may vary each year based on different factors. Your employer has discretion to pay plan administration expenses from its own assets or from the plan's assets, and may change its decision on how such expenses are paid at any time. Other fees, such as a fee for a new service, may apply. Fees that are charged to the plan or to your account directly will be shown on your quarterly statement. Some of the plan's administrative expenses for the preceding quarter may have been paid from the total annual operating expenses of one or more of the plan's designated investment alternatives.

Fees paid by participants also include any shareholder type fees noted in the investment chart.

*In addition to the Target My Retirement investment solution fee(s) noted above, participants utilizing the Target My Retirement investment solution pay the total annual operating expenses of the funds in which their account is invested, less amounts rebated back to the fund in certain situations.

+Assets in The Target My Retirement investment solution also incur the following fee(s) beyond those in the above table, up to the maximum fee shown below.

- Standard Asset Fees: 29.00 bps for fund market value of \$0.00 and greater.
